nBox
NETWORK IN A BOX

Loyfam
Creative technology, solutions & support

Why pay for small business services and solutions at big business prices?

Loyfam was started with the idea that small business services don't have to be priced expensively to make a difference.

We've designed the nBox to improve on the computer server concept that businesses have used for so long.

We believe that, for too long, small business has been strangled by expensive software and extravagant equipment, completely ignoring the needs of your small business.

We understand the challenges facing small businesses and focus on delivering innovative solutions catered to small business.

Key Features of the nBox

- The nBox uses cutting-edge virtualisation with the latest hardware to comfortably meet and exceed your business needs

- Anti-SPAM* and strong anti-virus software

- Intuitive backup and restore which won't impact your operations

- MYOB and Quickbooks acceleration *

- CRM: customer contact manager and organiser *

- Email and document collaboration *

- Requires a minuscule amount of electricity compared to traditional servers

- Remote document access (access work documents and applications from home) *

- The nBox uses open source technology so there is no need to pay thousands for over-priced brand name software

- The nBox is backed by IT professionals who understand the need for responsive customer service

- We at Loyfam know that our little nBox will outperform the competition and we promise never to put you on hold!

* Optional solutions for use on the nBox may require additional licensing and are not covered in the base unit + maintenance pricing.

Server Comparison

	nBox NETWORK IN A BOX	Dull Server
